=	8.2%	14.6%	11.96%
Asset turnover =	$\frac{\text{Sales}}{\text{Capital employed}}$	$\frac{\text{Sales}}{\text{Capital employed}}$	$\frac{\text{Sales}}{\text{Capital employed}}$
=	$\frac{78,000,000}{31,200,000}$	$\frac{144,625,000}{44,500,000}$	$\frac{222,625,000}{75,700,000}$
	2.50 Times	3.25 Times	2.94 Times

	Division A's Manager	Division B's Manager	CEO	BenchMark
ROCE	8.2%	14.6%	11.96%	11.5%
Assets Turnover	2.5 Times	3.25 Times	2.94 Times	2.8 Times

As per the calculations above Division A manager will not be rewarded since the division has not achieved the target ROCE and asset turnover of 11.5% and 2.8 respectively.

However Division B manager will be rewarded since the target ROCE and asset turnover both are achieved.

Overall Teazzy Limited has achieved the target ROCE and asset turnover therefore CEO will be rewarded.

Suggested Answers to Question Eight:

A)

$$\begin{aligned} \text{a) Sales} &= (125,000 \times 800) + (350,000 \times 250) \\ &= 100,000,000 + 87,500,000 \\ &= \underline{\underline{187,500,000}} \end{aligned}$$

$$\begin{aligned} \text{Contribution} &= 187,500,000 - 148,500,000 \\ &= \underline{\underline{39,000,000}} \end{aligned}$$

$$\begin{aligned} \text{Combined Profit Volume Ratio} &= \frac{\text{Combined Contribution}}{\text{Combined Sales}} \times 100 \\ &= \frac{39,000}{187,500} \times 100 \\ &= \underline{\underline{20.8\%}} \end{aligned}$$

B)

a) Direct material 2,500Kg is short for the estimated production.

Product	Demand	Material requirement (Kg)	Total Requirement (Kg)
G1	10000	2	20,000
G2	9000	2	22,500
G3	6000	5	30,000
			72,500
Material availability			70,000
Shortage of material			2,500

Product	Demand	D. Labour (Hrs)	Total Requirement (Hrs)
G1	10,000.00	1.00	10,000.00
G2	9,000.00	1.50	13,500.00
G3	6,000.00	2.50	15,000.00
			38,500.00
D. Labour Hours availability			39,000.00

Therefore, Limiting factor is Direct Material. Because the maximum availability for the next month is only 70,000kg where it requires 72,500kg of Direct Material.

Accordingly the production plan would be as follows;

Product	Production	Material requirement per unit (kg)	Total requirement (kg)
G2	9,000	2.5	22,500
G3	6,000	5	30,000
G1	8,750	2	17,500
